ACKNOWLEDGMENTS

I wish to express my deep appreciation and sincere gratitude to Professor Mona A. Khalifa, my academic supervisor for the research. I would like to acknowledge her valuable guidance, suggestions and useful remarks during the preparation of this thesis. Her keen and devotion of time and energy in working with me on the drafts of the thesis has been most exceptional. I am also grateful to Professor Atef M. A-Moneim for his valuable comments on mathematical and statistical work in this thesis.

I also take this opportunity to express my deep gratitude and sincere profound to Professor Hisham Makhoulf, CDC Director. My thanks to all CDC members, Teaching Staff and the Administrative Personnel of the Center.

My gratitude is also extended to Prof. Soliman Abdel-Ati, Prof. Amany Mousa, Mr. Saad Zaghloul, and Dr. Ferial Abdel-Kader Ahmed, and Dr. Ibrahim Khodair Osheba, from whom I learn the basics and the substance of statistical and demographic analysis.

Special thanks are to Mr. Mahmoud Abdel-Fattah Ahmed, Head Librarian and Mr. Kamel Abo-Ghaly, Students Affairs Officer. The library and Computer staff are also acknowledged.

My thanks are extended to those who help me in the data collection for this research, my colleague Mr. Shehata Mohamed Shehata of the Ministry of Population, Directors of the National Population Council Governorate Offices, Dr. Samir Gerges Botros of the Ministry of Health, Mr. Salah Olwan of the Information, Education and Communication Center (IE&C), and all of my friends and colleagues in the National Population Council and Cairo Demographic Center.
